**As convicted Racketeer Nico Tino said: "It ain't personal, it's just business."**

While many of the ingredients were approved as additives for foods, they were not tested by burning them, and the burning of many of these substances changes their properties for the worse. **Over 4000 chemical compounds are created by burning a cigarette – 69 of those chemicals are known to cause cancer.**

Carbon monoxide, nitrogen oxides, **hydrogen cyanide** (yes the same one the Nazis used to gas the Jewish race) and ammonia are all present in cigarette smoke. **Known carcinogens** are in mainstream smoke, sidestream smoke or both. It's chilling to think about not only how smokers poison themselves, but what others are exposed to by breathing in the secondhand smoke. Take a good long look at this list and see what cigarettes are: a suicidal delivery system for toxic chemicals and carcinogens.

Sidestream smoke is qualitatively different from and more toxic than mainstream smoke.

***About 90% of secondhand smoke is sidestream smoke.***

As convicted Racketeer Nico Tino said: “It ain’t personal, it’s just business.”

Many poisons are more concentrated in *sidestream smoke* than in *mainstream smoke*

<u>Some examples</u>	<u>Sidestream / mainstream ratio</u>
Ammonia	5
Benzene	3
1, 3 Butadiene	3
Formaldehyde	up to 50
Benzo(a)pyrene	3
Anilene	30
Cadium	7
Nickel	13
Nitrosornicotine	up to 3

### The whole truth and nothing but the truth? The research that Philip Morris did not want you to see

Pascal A Diethelm, Jean-Charles Rielle, Martin McKee

- Experimental animals exposed to *sidestream* smoke showed higher toxicity than those exposed to *mainstream* smoke
- To reach the same effect *mainstream* smoke must be up to 4 times higher concentration than *sidestream* smoke

As convicted Racketeer Nico Tino said: "It ain't personal, it's just business."

### Mortality associated with passive smoking in Hong Kong

- Non-smokers exposed to second-hand smoke had high excess risks of mortality from
  - \* Heart disease
  - \* Stroke
  - \* Respiratory disease
  - \* Cancer
- Passive smoking kills 1324 non-smokers each year in Hong Kong

S M McGhee, S Y Ho, M Schooling, L M Ho, G N Thomas, A J Hedley, K H Mak, R Peto and T H Lam. *BMJ* 2005; 330:287-288.

Active smokers will have very high exposures to second hand smoke from other smokers nearby

## CONCLUSION

**SMOKERS AND NON SMOKERS ALIKE ARE SERIOUSLY DAMAGED BY EXHALED MAINSTREAM AND FRESH SIDESTREAM SMOKE (PASSIVE SMOKE). PASSIVE SMOKING KILLS 23% OF THE 7,000 PEOPLE WHO DIE EACH YEAR IN HONG KONG FROM SMOKING RELATED ILLNESSES.**

**THE ONLY PEOPLE WHO BENEFIT FROM YOUR TOBACCO RELATED ILLNESSES ARE THE TOBACCO COMPANIES AND THE FUNERAL PARLOURS.**

**USE YOUR FREEDOM TO CHOOSE - REJECT TOBACCO !**
