[Read](#) the Scientific Update on our smoke-free products

- **Our Goals**

Our overarching goals are to develop RRP[s](#)[more information](#) **that are acceptable to adult smokers and to conduct rigorous and scientific assessment to demonstrate that they reduce risk and comply with emerging standards**

[Understand our goals](#)

Our Reduced-Risk Product assessment programme is facilitated and supported by a world-class Research and Development (R&D) infrastructure. We employ over 300 leading scientists and engineers and have state-of the art biological and analytical capabilities at sites around the world.
